

Face painting activity - Facial and trigeminal nerve

Group: pairs

Activity: 10 mins

One student act as the painter, the other as the canvas.

Painter:

1) Paint the outline of the parotid gland and the branches of the facial nerve emerging from its anterior border on one side of your partner's face

2) On the other side of your partner's face paint the sensory territories of the 3 divisions of the trigeminal nerve.

If time permits, swap roles and repeat the exercise.
